

Press Release

Date of Issue: January 2016

Semmco Ramps up for 2016

British engineering company Semmco is delighted to welcome a number of new staff who bring a wealth of experience. They have been selected to join the team to cover service to customers, increase in orders and implementation of delivery schedules and their skills will be of value in purchasing administration, production, sales support and design.

Research shows that one of the reasons Semmco's customers choose their products is because of the bespoke design and build, resulting in equipment which goes beyond that offered by the competitors and importantly, favoured by the engineers who use it.

Continuing on from the purchase of equipment, customers enjoy the good working relationship that develops with the company.

The quality of the team being assembled is designed to future proof products and ensure that customers are given time and support before, during and after the delivery of their equipment.

About Semmco:

Semmco, established in 1993, is a design, engineering and manufacturing company offering a range of specialist services to the rail, aviation, industrial and military markets for service and maintenance of rolling stock, planes and specialist equipment and plant. The company is known as a UK leader for quality in its field.

Within the Rail market Semmco designs and manufactures a comprehensive range of access solutions - Rail Roof Access, Rail Access Steps, Rail Front Access Steps, Rail Modular Access Steps and Rail Fixed Gantry.

Within the Aviation market, Semmco designs and manufactures a comprehensive range of access solutions - Aircraft Engine Access, Engineer Maintenance steps, Cargo Bay Access and among other access platforms.

Providing engineering design and consultancy for special projects and bespoke customer requirements, the company is committed to quality, safety and reliability through innovative designs, while manufacturing cost effective engineered solutions.

Based in Woking, Surrey, Semmco supplies equipment across the UK and around the world.
